

AJ's Prompt

Submitted Jul 19, 2026, 1:01 PM

8m 43s Active writing time	5 Revision milestones
205 Final word count	None Large pasted additions

Writing journey

Each milestone records a visible revision in the saved draft.

Set the first direction

The first saved draft establishes its opening in 42 words.

Jul 19, 2026, 12:30 PM - 1m 35s active writing

Rework the draft

The draft replaces a sentence with new evidence and detail.

CHANGED TEXT

" **REMOVED**

For one, they lay eggs.

+ **ADDED**

For one, they lay eggs, but you probably knew that.

A lesser known fact about them is that they can be venomous.

Platypuses have a venomous barb by their hind legs that can stab you if you are not careful.

Why do they have it?

Who knows!

Another weird fact is that they sweat out milk to feed their offspring.
